CIA/NR CB 64-5 Jeanny 1964

DEPTOYON OF THE SOURH VIESCHAM - LAGE BOURTARY ON US MAPS

The delineation of the South Vietness — Incs boundary differs on certain map sheets published in the United States. In question are sheets NE 45-16, NO 43-4, and NO 43-6 of Army Map Service (AMS) Series 1509, first and second editions, and the corresponding sheets of the Air-Ground Charts (AOC) published by the Aeronautical Chart and Information Center (ACIC) on which the depiction of the boundary is identical to that on the second edition of the AMS meries.

boundary as depicted on the map sheets of the AMB L509 second edition and on the ACIC charte is taken from the French 1:100,000 series maps published between the 1930's and early 1950's and is considered to be the most accurate of any shown on available maps. The South Vietnam—Leas boundary as shown on the map sheets of AMS L509, first edition, published during the mid-1950's, was compiled chiefly from the French series, Corte Boutière de l'Indochine, 1:400,000, which was published in the early 1950's. The Army Map Service and the Geographer of the Department of State now consider that the delineation of the South Vietnam—Leas boundary as shown on the French series at 1:400,000 and on the first edition of AMS L509 is grownly inaccurate in some sections. Concern

CONTINUE III.

Excluded in a sitematic deways seing and declars service over possible further use of this edition is largely scademic, however, since distribution stocks of the map sheets were destroyed upon issuance of the second edition.

It should also be noted that:

- 1. The Army Map Service is preparing to compile and publish a third edition of the L509 map series. First stands are tentetively scheduled for 1965.
- 2. The delineation of the South Vietnam -- Leos boundary as shown on the 1:100,000 series maps published since 1950 by the Setional Geographical Service of Vietnam is considered by AME to be less accepted than the delineation on the older French series at 1:100,000.
